

Austin T. Chambers

Partner

chambers.austin@dorsey.com

Denver – 303.629.3449

Austin is passionate about data privacy and technology, and provides client-focused advice on data protection, information, and technology matters.

Austin's practice is focused primarily on data privacy and security compliance, and related technology and information issues. He works with clients to develop privacy and security programs, privacy policies, and understand the legal/business risks related to the processing of personal and proprietary information, and other commercial and technology transactions. Austin leverages experience in both legal and business roles to create client-focused solutions, and has client and work experience across diverse industry verticals, and ranging from startups to multinationals, nonprofits, and government.

Austin regularly advises clients on compliance with GDPR, ePrivacy, CPRA/CCPA, FERPA, CAN-SPAM, TCPA, HIPAA, COPPA, and other state, federal and international privacy/security laws. He has advised on and negotiated data protection, information security, and data transfer/standard contractual clause agreements, as well as media/advertising issues, product development, privacy-by-design, and data licensing. He has assisted on transactional due diligence, and advised clients through regulatory investigations, incident response and mitigation, and the development of comprehensive information security programs. He has also worked with clients in relation to the commercialization of personality rights in media and advertising.
