

Salt Lake City

by Heath L. Waddingham, Hannah Barnes, Maryann Bauhs, Brooke S. Johnson, Jason B. McCammon, Michele M. Myer, and Brenden Stuart

We've built the Salt Lake office during the last 20 years with careful attention towards maintaining a collegial, industrious environment where attorneys can grow their varied local and regional practices while benefitting from Dorsey's global platform. The strength and scope of our corporate law practice in Salt Lake anchors the office, with additional attorneys focusing on litigation, bankruptcy, mining and IP.

Utah is widely recognized for its world-class snow, five national parks and affordable lifestyle. Lesser known features, now increasingly gaining publicity, are its thriving business economy, low unemployment rates, and a burgeoning scene for tech companies and entrepreneurs. Combine those features with Utah's young, multi-lingual, and educated workforce, and you'll begin to understand why many companies are establishing or moving their employees to the Beehive State.
